Your customized belt. Compose it yourself:

▶ End fittings
Compose your end fittings to suit your needs. No matter if you use seat and cargo tracks or lashing points we have solutions for all load capacities. Always with a corrosion resistant surface.

▶ Buckle
Choose a buckle from our large product range to suit your load, lashing needs, required pre-tensioning force and load capacity. If it's not available, it doesn't exist.

▶ Webbing appearance & technology
We supply polyester (PES) webbings with flame retardant characteristics complying with FAR/CS 25.853 (a) Part I Appendix F (iv). Also, Airbus approved webbings according to ASNA3573 are available. Choose from a wide variety of colours.

▶ Printed webbing
You have a choice here, too: no printing at all, "Hands off!", your company name or your logo. We print what you want, even if you only order one strap.

▶ Extras
Protection pads for the buckle protect load with sensitive surface, a fold-back prevents the loose end from falling off the buckle. Label protectors reduce wear of heavily used webbings. You select it, we make it.
